

Trouper

The Trouper rocking recliner offers so much more than a simple rocking chair. With 16 different reclining positions, it's never been easier to find your perfect position to relax.

The convenient handle at the side also allows you to adjust the leg rest to three different positions and when you're not using it as a recliner, you can gently rock your cares instead.

With a casual style and wear-resistant materials, this rocking recliner is built to last and will keep your family comfortable for years to come.
